Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1 and 4 as set forth in the instant claims do not reasonably have support as set forth. The specification discloses that the diffusion ratio R for a water molecule in the supply stream chamber is between 0.75 to 3. Although the specification says that above 3 that the flux may increase as shown by way of Figure 8, there is not adequate support to show that the flux may not increase more at values of around 10. Therefore, the examiner contends that there is new matter being claimed which is not supported by way of the specification or disclosed in earlier applications as the applicant's have set forth in their instant arguments. Therefore, the rejection of claims 1-6 under 35 USC 112 first paragraph is set forth.

Applicants are advised to remove the new matter from the instant claims, amend the claims or cancel the claims and add new claims without the new matter, in order to advance prosecution of this application.
